

AZ-Armaturen SIL 3 Certified on 2-way, 3-way, and control valves

AZ-Armaturen South Africa is proud to announce its achievement in obtaining a SIL (Safety Integrity Level) 3 certification on their 2-way, 3-way, and control valves from Exida.

The certification assesses and certifies that the organisations products have been developed and manufactured in accordance with the IEC 61508 standard.

Safety Integrity Level (SIL) is a unit of measurement for quantifying risk reduction. The SIL principle is used to reduce risk posed by technical equipment and is defined within a range from 1 (lowest) to 4 (highest). The SIL 3 capable rating which has been achieved by AZ-Armaturen South Africa is designed to provide their customers with reliable actuation solutions in critical applications without compromising their Safety Instrumented Systems (SIS).

 A photograph of a worker in a blue jumpsuit and a blue hard hat, standing in a flooded tunnel. The worker is holding a blue hose connected to a yellow Atlas Copco WEDA pump. The pump is partially submerged in the water. The tunnel walls are concrete and there are pipes and structural elements visible in the background.

BLOWING DOWN THE COST OF ENERGY USAGE

Atlas Copco's WEDA pumps and accessories are designed for an extensive range of dewatering applications in, among others, the rental, construction and mining industries. They provide the performance, reliability and ease of use you need.
